## About Us

Testworks is a social venture pursuing social innovation through technology. We are experts in AI data processing and software testing. Our mission is to create social values by providing fair job opportunities and inclusive employment in science, technology, engineering and mathematics (STEM).

---

## Founder & CEO

### Dale Yoon

Master of Computer Science, Cornell University  
Bachelor of Arts in Media & Communication, Korea University

CEO Dale Yoon has 20 years of previous work experience at domestic and international companies such as Samsung Electronics and Microsoft Corporation. He established Testworks Inc., a social venture and an expert in AI data and software testing, in 2015 to create social value in the STEM workforce and solve diversity problems. The foremost goal of the founder when he established Testworks Inc. was to confirm the sustainability and extendibility of its business model. In 2021, Testworks Inc. continues various projects by extending social value based on technology with about 150 employees.

## Business Field

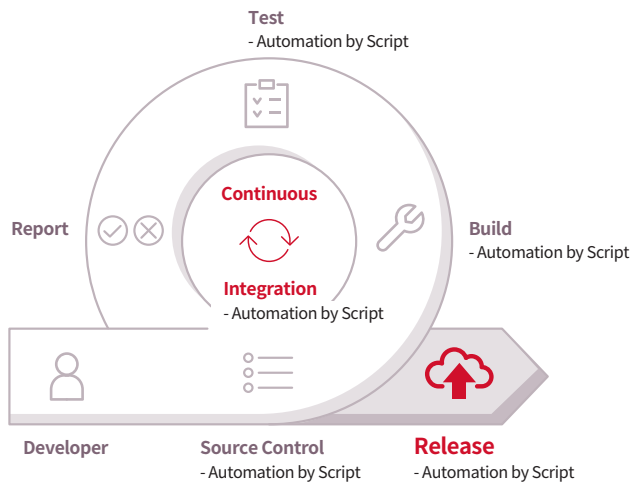

### Platform Business for Constructing AI Data

Starting with a customized consultation, Testworks provides a one-stop service for the whole process to creating AI datasets.

<p><b>Edge AI</b></p> <p>Smarter solution for collecting data with edge computing</p>  <p>Edge AI saves time for collecting and validating data by identifying appropriate data in real-time.</p>	<p><b>aiworks</b></p> <p>A dedicated platform for collecting and processing AI data</p>  <p>aiworks is a dedicated crowd-sourcing platform for collecting and labeling data. With Testworks' well-trained data labelers and reviewers, aiworks quickly constructs large-scale datasets..</p>	<p><b>blackolive</b></p> <p>AI data processing solution with automation</p>  <p>blackolive is the all-in-one solution from preprocessing AI data to training and validating AI models. With auto-labeling, blackolive improves productivity and collaboration.</p>	<p><b>Data Expert</b></p> <p>Verification by AI data quality experts</p>  <p>Creating high-quality data is ensured with inspection and quality control processes by in-house data experts and external professionals. Based on the evaluation of model performance, data experts offer exclusive follow-up management and customer service.</p>

### Test Automation Business

Testworks provides an end-to-end service for the whole Software Development Life Cycle, including testing embedded software, real-time multi-tool testing, and tailored testing services.

# Professional ICT Training Center

As more businesses move to online and contactless platform, Testworks set up a training center to provide 5-step job opportunities that form a virtuous cycle of creating social values.

- 01** Job Introduction  
Introducing the AI industry and data labeling jobs to those with limited access to ICT related information 
- 02** Job Training  
Providing basic training for digital competence, and basic and advanced training for data labeling 
- 03** Sustainable Jobs  
Connecting qualified trainees with jobs for long-term employment 
- 04** Competency Development  
Providing growth opportunities to explore career options as reviewers, managers, and trainers 
- 05** From a receiver to a giver  
Becoming a contributing member of society by creating internalized social values 

## DataQ subsidiary

DataQ is a registered Standard Workplace for Persons with Disabilities where people with developmental disabilities, hard of hearing people, and people without disabilities work and grow together. DataQ provides a work environment where diversity is valued and people can advance their career through continuing education.

## Corporate Social Responsibility (CSR)

- Education** Testworks provides inclusive training and fair job opportunities to disadvantaged people so that they can be contributing members of society.
- Local Community** Testworks, together with other business partners, is committed to transforming local communities by solving social problems through technology and innovation.
- Core Value** Testworks embraces the following core values.

Infinite Possibilities	We tap into the boundless potential of every worker to pursue technological development and innovation, critically analyze problems from the client's point of view and pioneer new markets by adopting fresh approaches.
Craftmanship	Our devotion to quality and precision allows us to meet client needs and make a positive difference in the world. We strive for the highest professional standards to best serve our customers.
Globalization	With our globalized platform, we can provide superior technologies and services to clients, wherever they are in the world.
Creating Social Value	We help create a society that does not discriminate based on nationality, race, gender or disability, and fulfill our responsibility towards the community by proactively addressing various social issues.
